

KIV/PTE Semestrální práce

Pavel Třeštík

Zátěžové testování – řadící algoritmy

- Zdroj algoritmů:
<https://stackabuse.com/sorting-algorithms-in-java/>
- Sorty: Bubble, Insertion, Selection, Merge, Heap, Quick, Native
- Řazení nad poli: seřazený, seřazený opačně, náhodný, jednou náhodný
- Metriky: Avg. time [ns], Throughput [op/s]
 - Ale ve vizualizaci je všude použit pouze avg. time

Number of records
